About

A dedicated web and mobile applications Front End engineer specializing in React, I have extensive experience working in dynamic startup environments. I have contributed to several medium and large-scale projects, collaborating with cross-functional teams to deliver innovative and high-quality solutions. Known for being a team player, I am committed to fostering collaboration and achieving shared goals in fast-paced development settings.

Experience

Noesis Solutions

Front End Engineer | Sep 2024 – July 2025

Served as a contract front-end developer for an educational web application, taking full responsibility for designing the project's architecture.

Flarmio

Front End Engineer | Sep 2023 – Aug 2024

Acquired hands-on experience with advanced technologies such as Web Sockets, GraphQL, and Jest while developing cross-platform applications using Next.js and Capacitor as a contract developer.

Coded Lines

Mobile & Web Engineer | Sep 2021 – Jun 2023

Gained experience working full time on diverse mobile and web applications in a startup environment, utilizing React Native and Next.js, with key responsibilities including team training and project management.

Progressnet

React Native Developer | Apr 2021 – June 2021

Solely developed a mobile application using React Native, gaining valuable experience in the production lifecycle and collaborating effectively with Back End and design teams as a contract developer.

Music Industry

Freelance Musician | Sep 2005 – Dec 2020

Performed as a stage musician for various artists and concurrently served as an instructor of bass guitar and music theory at conservatories and music institutes.
